

## Newly Launched Collection – Huge Success

Thanks to our creative designers, we are proud to inform you, that the newly launched **Bohém edition** was even more successful, than we thought.

It was firstly introduced at the European international lighting fair EuroLuce 2019. in Milan.

They can fit to any space in many ways and sizes.

Patinas has enlarged the finish possibilities with two others. Now you are able to place your order in matt nickel and matt brass as well.

The four new modern lighting collections are handcrafted of brass as usually. They are available in 5 finish variations and can be easily customized. The lighting sources are LED, G9 or E27 bulbs.

Due to their variability the lamps can be adapted into residential and hospitality projects as well.

Inverno collection lamps look like trees with leaves. All lights are available with clear, frosted and coloured glasses.

Ottone pendants with coloured or plain glasses are easily adjustable: height and inclination angle are variable by steel wires.

Primavera lamps resemble flowering branches. Just as Ottone lamps, we can deliver them with clear, frosted and coloured glasses. The wall lights can be mounted vertically, horizontally or even as ceiling lamps.

Éclipse lamps look like saucers or UFOs. They are manufactured with G9 bulb or LED stripes. The pendants can be installed on same or shifted level, even in a 10 m high space.

The wall light is a perfect choice for decorative walls in classy restaurants, especially when multiplied.
